***Co-operative Education**

Co-operative education is a partnership between school, business/industry and involves the participation of students, teachers and employers. The co-operative education placement must be related to a course within your high school curriculum at the grade 10, 11 or 12 level. Co-op provides the successful student with credits towards their diploma and may lead to future employment. For more information contact info@mertoncentre.com.

**** Special Education...**students planning to enroll in a continuing education course should be aware that there are no special education resource teachers available to assist with program modification. It is recommended that students discuss IEP strategies at their home school before enrolling in a continuing education course.

*** Registration is on-line at www.merton.hcdsb.org/secondary-credits/night-school.

For more information call Continuing Education Services at (905) 849-7555.

REGISTRATION DEADLINE: Wednesday, September 15, 2021
